The oil made from hazelnuts possesses a potent flavor and is used as a cooking oil. Moreover, hazelnut oil is used as moisturizer and emollient that helps in treating dry skin.

The growth of the global hazelnut market is diver by increase in applications of hazelnuts ingredients in the food & beverages industry. However, availability of substitutes of hazelnuts such as almond and peanuts is expected to hamper the growth of the market, as their production is abundant as compared to hazelnuts. Conversely, undersupply of hazelnuts acts as a lucrative opportunity for the manufacturers, which is expected to fuel the hazelnuts ingredient market in the near future. Moreover, innovation of new uses of hazelnut ingredients for multiple purpose such as human foods, biofuels, animal foods, and cooking oil is opportunistic for market expansion.
