

Prodly Adds Work Management Integration to DevOps Suite

Prodly DevOps Also Integrates With Salesforce DevOps Center

PALO ALTO, CA, UNITED STATES,
September 14, 2022 /

EINPresswire.com/ -- Prodly, the [next-gen DevOps platform](#) for change

management in Salesforce, today announced the general availability of integrations with the work management app Agile Accelerator and Salesforce DevOps Center for its DevOps suite. The suite includes Sandbox Management and Prodly DevOps, which is available in three editions

ProdlyTM

“

Our integrated solution eliminates waste in the change management process, which enables customers to accelerate time to value, reduce costs, and deliver higher-quality solutions for the business.”

David Clark, VP of Product at Prodly

depending on business needs. With these new integrations, Prodly provides greater flexibility and control over the full Salesforce DevOps workflow from a single pane of glass.

Prodly DevOps is specifically designed to streamline the DevOps workflow in Salesforce—from change request intake through change development, deployment, delivery, and compliance—all from one user-friendly dashboard. It offers easy, streamlined work management, as well as the ability to clearly track the business impact of deployed changes. In addition, the DevOps Center integration gives customers the flexibility to opt for source-driven metadata

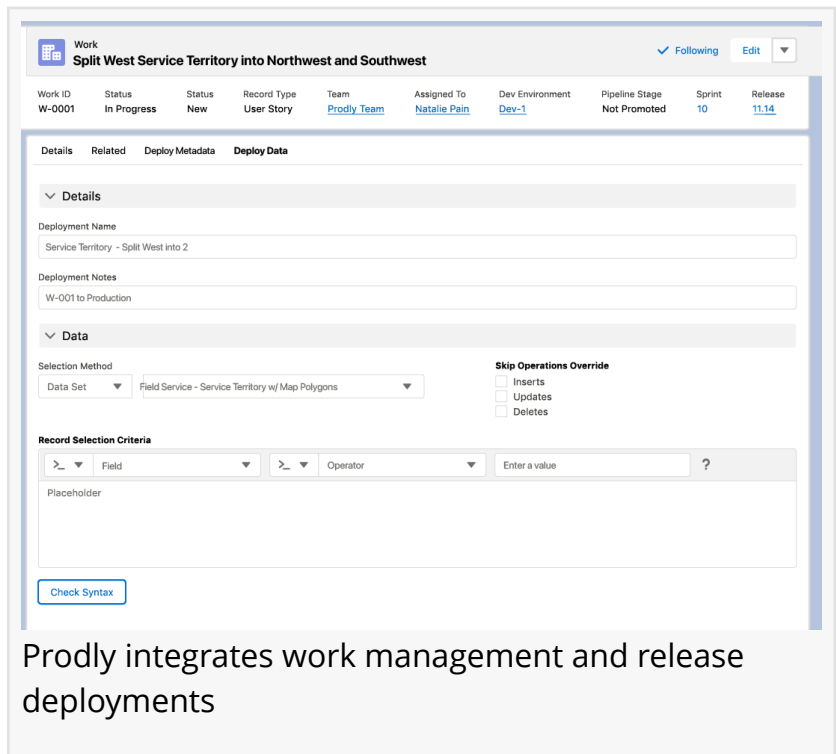

deployment.

“Salesforce teams are under more pressure than ever to demonstrate ROI for their projects,” said David Clark, VP of Product at Prodly. “Pairing work management with sandbox management and release management, gives decision makers visibility and control over what is getting built and why. Our integrated solution eliminates waste in the change management process, which enables customers to accelerate time to value, reduce costs, and deliver higher-quality solutions for the business—all while remaining in regulatory compliance.”

The work management and DevOps Center integrations are included in all Prodly DevOps editions.

ABOUT PROLY

Prodly enables Salesforce teams to increase productivity by 80 percent while reducing risk up to 30 percent by putting next-gen DevOps into the hands of admins and citizen developers. By reimagining the change management experience, Prodly delivers greater business agility, governance, and compliance without straining IT. The company's DevOps offering has rapidly expanded from a CPQ data deployment tool to include solutions for modern Salesforce DevOps, data migration, sandbox seeding, and SOX compliance. Prodly sets the standard for low-code DevOps and can be implemented 20 times faster than traditional applications.

The screenshot displays the Prodly user interface for configuring a deployment. At the top, a header bar shows the work item title 'Split West Service Territory into Northwest and Southwest' with a 'Following' status and an 'Edit' button. Below this, a metadata table lists key details: Work ID (W-0001), Status (In Progress), Record Type (User Story), Team (Prodly Team), Assigned To (Natalie Pain), Dev Environment (Dev-1), Pipeline Stage (Not Promoted), Sprint (10), and Release (11.14). The main configuration area is divided into tabs: Details, Related, Deploy Metadata, and Deploy Data. The 'Details' tab is active, showing fields for 'Deployment Name' (Service Territory - Split West into 2) and 'Deployment Notes' (W-001 to Production). The 'Data' section includes a 'Selection Method' dropdown set to 'Data Set', a 'Field Service - Service Territory w/ Map Polygons' dropdown, and a 'Skip Operations Override' section with checkboxes for 'Inserts', 'Updates', and 'Deletes'. A 'Record Selection Criteria' section features a 'Field' dropdown, a '>' operator, and a text input field labeled 'Enter a value'. A 'Placeholder' section is also present. A 'Check Syntax' button is located at the bottom of the configuration area.

Prodly integrates work management and release deployments

Prodly powers change management workflows for high-growth and Fortune 100 companies, including American Express, Expedia, Stanley Black & Decker, Cardinal Health, Nutanix, Johnson & Johnson, Splunk, Verizon, DoorDash, and Snowflake. The company is privately held and based in Palo Alto, California with global operations. For more information, visit prodly.co.
