

# Graphene in Batteries & Supercapacitors Market Will Reach Nearly USD 268.2 Million By 2027: Reports and Data

*Growing preference and demand for electric vehicles is a significant factor influencing growth of the market.*

NEW YORK CITY, NEW YORK, USA,  
September 15, 2022 /

EINPresswire.com/ -- The global  
[graphene in batteries &](#)

[supercapacitors market](#) is forecast to reach a market size of USD 268.2 Million by 2027, and register a significantly high revenue growth rate over the next seven years, according to the latest report by Reports and Data. Growing demand for graphene in batteries & supercapacitors can be attributed to rising demand for electric vehicles in countries across the globe. A surge in demand for high-performance, more fuel-efficient, and low-emission vehicles, coupled with stringent regulatory policies to curb vehicle emissions is driving demand for electric vehicles. Sales of electric vehicles was over two million units worldwide in 2018, representing a Y-o-Y growth of 63.0%, which has been reported as a positive sign in the endeavor to combat air pollution and other related initiatives on a global perspective. Energy storage units are indispensable for the functioning of electric vehicles, and graphene batteries are swiftly garnering traction in the electric vehicles market as they enable faster cycle times and improved electrode density. Furthermore, graphene batteries have longer charge retention property than graphite-based electrode batteries, thus increasing the battery life.

## The COVID-19 impact

The COVID-19 pandemic had a severe impact on graphene in batteries & supercapacitors market. Global shutdown of the automotive industry and movement restriction have severely affected the sales of electric vehicles. Also, mass layoffs have resulted in decreased consumer spending, plummeting the demand for consumer electronic products, especially those belonging to premium segment. All these factors have resulted in a decline in demand for energy-storage units.

Further key findings from the report suggest

- Graphene-based batteries (such as rechargeable Li-ion batteries) are lightweight, more durable, and ideal for high-capacity energy storage. Also, graphene batteries improve energy density, shorten charging duration, and offer improved battery life-span.
- Bio-supercapacitor is an emerging technology, and are designed with electrodes made of graphene layered with altered human proteins. A bio-supercapacitor holds potential as next-generation implantable devices to expedite bone growth.
- The graphene in batteries & supercapacitors market revenue in Asia Pacific contributed to largest revenue share in the global market in 2019, attributed to rising government initiatives to curb carbon-dioxide emissions, increase sales of electric vehicles, and growing awareness about non-conventional energy resources in countries such as China and Japan. Besides, rising disposable income is another factor causative of increased consumer spending on electronic products, which is also expected to drive market growth to a significant extent over the forecast period.
- Key market players include Global Graphene Group, Graphenano Nanotechnologies, Samsung SDI, Nanograf Corporation, Graphene 3D Lab Inc., Nanotek Instruments Inc., Huawei Technologies Co. Ltd., XG Sciences, Vorbeck Materials Corporation, and Graphene Batteries AS.

Inquiry Before Buying @ <https://www.reportsanddata.com/inquiry-before-buying/3756>

For the purpose of this report, Reports and Data has segmented the global graphene in batteries & supercapacitors market on the basis of type, industry vertical, and region:

Type Outlook (Revenue, USD Million; 2017-2027)

- Batteries
- Supercapacitors

Industry Vertical Outlook (Revenue, USD Million; 2017-2027)

- Consumer Electronics
- Industrial
- Automotive
- Aerospace & Defense
- Power
- Medical
- Others

Regional Outlook (Revenue, USD Million; 2017-2027)

- North America
  - o U.S
  - o Canada
- Europe
  - o Germany
  - o UK
  - o France
  - o BENELUX
  - o Rest of Europe
- Asia Pacific
  - o China
  - o Japan
  - o South Korea
  - o Rest of APAC
- MEA
  - o Saudi Arabia
  - o UAE
  - o Rest of MEA
- Latin America
  - o Brazil
  - o Rest of LATAM

About Reports and Data

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely

focus on your purpose to locate, target, and analyze consumer behavior shifts across demographics, across industries, and help clients to make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Products, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Reports and Data has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
