In terms of region, North America is projected to dominate the market. This is due to the expanding healthcare industry in the United States and Canada. Furthermore, the efforts of the region's governments are likely to promote the expansion of the global heart valve repair and replacement market throughout the forecast period of 2022 to 2028. Apart from this, the Asia Pacific and Europe are also anticipated to have considerable market growth due to an increasing geriatric population and improving health infrastructure in these regions.
