

Global OTC Braces and Supports Market Research Survey Report | expected to be at 1.7 USD Billion in 2025 at CAGR of 5.5%

The global OTC braces and supports market was valued at 1.43 (USD Billion) in 2018 and is expected to be valued at 1.7 (USD Billion) in 2025 at a CAGR of 5.5%

SUITE N202, NEW YORK, UNITED STATES, September 15, 2022 /EINPresswire.com/ -- The report covers the Estimation and [Analysis of OTC braces and supports market](#) on a global as well as regional level. The study provides an in-depth evaluation of the market completion, business rivalry, opportunities, trends, and industry-validated market data. The report also gives historical data from 2016 to 2018 along with a forecast from 2019 to 2025 based on revenue (USD Billion).

Growth in the market is major boosted by the rising occurrence of orthopedic disorders & diseases, rising public awareness associated to preventive care, and the increasing number of accident and sports-related injuries

Growing incidences of orthopedic disorders, an increase in public awareness pertaining to preventive care, and a surge in the cases of accidents & injuries in sports will boost the growth of the OTC braces and supports industry over the upcoming years. Apart from this, a rise in the cases of osteoporosis will boost product sales in the near future. Furthermore, the easy availability of products through online retail stores will boost business growth over the forecast period. However, high product costs and rapidly changing compensation policies will inhibit business growth over the forecast timeframe.

The global OTC braces and supports market was valued at 1.43 (USD Billion) in 2018 and is expected to be valued at 1.7 (USD Billion) in 2025 at a CAGR of 5.5%.

Market Trends and Growth Factors

Knee Braces And Supports Segment Projected To Clock The Uppermost CAGR In The Coming Period

Knee braces are used as a follow-up treatment after knee operation related with injuries such as patella tendonitis, sprained medial knee ligament, knee arthritis, torn knee cartilage, and runner’s knee. The high development of the knee braces and supports section can be credited to the increasing obese and geriatric population (who are at an elevated danger of getting osteoarthritis and different knee-associated conditions) and the rising occurrence of sports injuries along with the advantages provided by these goods, such as lowered rotation of the

knee, lateral and medial support, defense from the post-surgical danger of injury, and restricted injury during motion.
