The research also compares revenue before and after the pandemic and discusses how COVID-19 affected the sector. In line with this, the customer receives comprehensive knowledge about the market and the company from a past, present, and future perspective and may be able to allocate funds and resources effectively.

Global Distilled Spirits Market

Distilled spirits are a class of alcoholic beverage obtained from distillation of mixture produced from alcoholic fermentation. The distillation process primarily increases the alcohol content and reduces the dilution by components such as water. This results in higher alcohol content in distilled spirits compared to brewed beverages.
