The mental health apps market consists of sales of mental health apps by entities (organizations, sole traders, and partnerships) that refer to mobile and PC-based applications used by people to manage their mental health. These apps help people manage their medications and aid in reducing stress and monitoring symptoms of disorders. The user can get therapy virtually for conditions such as PTSD, psychotic disorders, anxiety disorders, and others.

[Global Mental Health Apps Market Trends](#)

Technological advancement is a key trend gaining popularity in the mental health apps market. Major companies operating in the mental health apps global market are focused on providing technologically advanced solutions to meet end-customer demands and strengthen their market position. These companies are implementing next-generation technologies into their services, such as CRM, video API, text API, and end-to-end patient engagement through AI, ML, and others. For instance, in January 2021, Moody, a health care company, launched an intelligent mental health care app that can identify and alert the user about psychological changes in their behaviour ahead of time and recommend corrective actions daily. It allows the user to create

daily journal entries with memories such as pictures, attachments, and others.
