The cloud project portfolio management market consists of sales of cloud project portfolio management solutions by entities (organizations, sole traders, and partnerships) that refer to a complete integrated solution that improves organizations' efficiency on projects. It will handle the organization's group of projects and processes that are selected and managed to offer better returns on project investments. The portfolio is selected to fulfill the organization's goals and also allows the project team to manage the project's overall risk.

Global [Cloud Project Portfolio Management Market Trends](#)

Strategic partnerships are a key trend gaining popularity in the market. According to the cloud project portfolio management market analysis, major companies are undergoing partnerships to strengthen their new product development activities and their position in the market. For instance, in April 2020, Planview, a US-based provider of dashboards for portfolio management, resource management, project management, and request management, partnered with

Cherwell, a UK-based provider of service and cloud-based IT service management solutions that help organizations' IT teams to implement, automate, and upgrade service and support processes. The partnership demonstrates Cherwell ITSM and Planview Portfolio Management's capacity to support shared clients in achieving business strategic and operational goals. Additionally, in 2019, the US-based Upland Software firm pushed its corporate vision with PPM software and teamed up with the US-based Microsoft software company. As a result of this collaboration, project team members can now interact, communicate, exchange documents, and arrange meetings straight from their PPM solution using Microsoft Teams and Upland's interface. Upland PowerSteering's integration with Microsoft Teams reduces the risk of ineffective project communication and increases business productivity.

Global [Cloud Project Portfolio Management Market Segments](#)
