

Imersion GIS Adds View In Map Feature to CountyPlatMaps.com

The only plat centric platform for searching, viewing and purchasing county plat maps in Texas.

THE WOODLANDS, TX, USA, September 20, 2022 /EINPresswire.com/ -- Imersion GIS ([IMGIS](https://www.imersiongis.com)) added a "View in Map" feature to its plat aggregation platform – [CountyPlatMaps.com](https://www.CountyPlatMaps.com).

Searches for plats are available in Texas and Colorado by specific counties. A results grid shows matches where plat documents may be added to a cart for purchase and download. The new View in Map function generates a plat polygon over a google map where it can be viewed in relation to its surroundings in a street or satellite view.

"Viewing a plat polygon in a GIS map is our most requested feature. Our customers may now preview the location, description and satellite view all in one interface." said Anil Adoni, Imersion GIS President.

"This is one of the many data sets and integrations available through Imersion GIS interfaces. We connected this to our CountyPlatMaps.com site to benefit our user base but also to illustrate the power of our GIS platform data." added Joe Garcia, Imersion GIS Product.

Imersion GIS is committed to making county plat maps more accessible than ever. Creating an account, searching counties and viewing a plat polygon in a parcel are all available at no charge. Only pay for downloaded plat files.

In celebration, IMGIS is offering a promo code of VIEWMAP for a free plat map file download until 9/30/22.

About Imersion GIS

Imersion GIS is a leader in title industry focused GIS based solutions. IMGIS has various public and proprietary data sets in Texas and surrounding states.
