Projector Market Research Report
2022-2027

The latest report by IMARC Group, titled "Interactive Projector Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2022-2027", offers a comprehensive analysis of the industry, which comprises insights on the [global interactive projector market](#). The report also includes competitor and regional analysis, and contemporary advancements in the market.

The global interactive projector market reached a value of US\$ 2.7 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 8.1 Billion by 2027, exhibiting a CAGR of 20.7% during 2022-2027. An interactive projector stands for the advanced image output device that makes a surface, such as whiteboards, projector screens or walls, interactable. It also enables the consumers to use the projection activities through a pen, mechanical stylus or a finger, and it runs through a camera to trace the movements. Interactive projectors are primarily used in educational institutes and collaborative organizational settings to improve the participants' real-time understanding and actively participate with the projected images. They also offer numerous advantages, such as convenient multi-touch collaboration, multi-user compatibility, and computer-independent interactivity.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.
