The manufacturing and construction industry has registered significant growth over the recent past with increasing availability of high-quality raw materials, streamlined supply chains, and development of new production processes. Factors such as rapidly growing construction and building sector, technological advancements in manufacturing techniques and rapid urbanization and industrialization across the globe. There has been a surging demand for green construction and energy efficient buildings owing to increasing awareness about environmental impact and carbon emission. Key factors such as rapidly expanding global population, increasing eco-friendly construction activities, and rising number of renovation and reconstructions across the globe are expected to boost global market growth during the forecast period. In addition, increasing trend of smart and aesthetic homes and buildings, increasing disposable income, and increasing focus on sustainability and use of environmentally-friendly materials are other factors expected to boost global market growth going ahead.

The report has been formulated by primary and secondary research and highlights business opportunities, challenges, scope, supply and demand analysis, innovations, and inventions. The report also covers latest business moves, product launches, strategic collaborations such as mergers and acquisitions and partnerships, technological advancements, and profitable business ventures.

The report further explores the segmentation of the market based on types and applications, and regional analysis.
