In vitro fertilization (IVF) is a type of assisted reproductive technology in which the ovum is artificially fertilized in laboratory settings and then implanted into the uterus. IVF is one of the widely used treatments, which assist couples with infertility problems, single mothers, and the

LGBT community to procreate. Increase in infertility rate, rise in trend of delayed pregnancies, surge in IVF success rate, and growth in disposable income worldwide drive the growth of the IVF services market globally. Moreover, introduction of advanced IVF techniques such as percutaneous epididymal sperm aspiration, three-parent IVF, and genetic diagnosis help to improve the success rate of IVF. However, the global IVF market growth is restricted by higher cost, complications associated with IVF treatment, low awareness and social stigma about IVF in some of the under-developed regions. The global IVF services market size generated \$12.5 billion in 2018, and is projected to reach \$25.6 billion by 2026, growing at a CAGR of 9.3% from 2019 to 2026.

Key Highlights from In Vitro Fertilization (IVF) Services Market Study.

Revenue and Sales Estimation – Historical Revenue and sales volume is presented and further data is triangulated with top-down and bottom-up approaches to forecast complete market size and to estimate forecast numbers for key regions covered in the report along with classified and well recognized Types and end-use industry. Additionally, macroeconomic factor and regulatory policies are ascertained in In Vitro Fertilization (IVF) Services industry evolution and predictive analysis.

FIVE FORCES ANALYSIS – In order to better understand In Vitro Fertilization (IVF) Services market condition five forces analysis is conducted that includes Bargaining power of buyers, Bargaining power of suppliers, Threat of new entrants, Threat of substitutes, and Threat of rivalry.

Competition – Leading players have been studied from In Vitro Fertilization (IVF) Services Industry depending on their company profile, product portfolio, capacity, product/service price, sales, and cost/profit.

Demand & Supply and Effectiveness – In Vitro Fertilization (IVF) Services report additionally provides distribution, Production, Consumption & EXIM\*\* (Export & Import). \*\* If applicable
