KANSAS CITY, KANSAS, USA, September 19, 2022 /EINPresswire.com/ -- Our [Mesothelioma](#) Options Help Center of Kansas is dedicated to providing top quality legal and medical assistance to those stricken with mesothelioma or [asbestos](#)-related [lung cancer](#). Anyone wishing to discuss their legal and/or medical options should call (888) 891-2200 to speak directly with an attorney from the Steinberg Law Group. www.mesotheliomaoptions.com

The Steinberg Law Group has decades of experience in handling mesothelioma and other asbestos-related cases. With offices in New York, California and Texas, the Steinberg Law Group has a national footprint that helps win the best possible financial compensation for clients. www.mesotheliomaoptions.com

Typically, asbestos exposure will have occurred sometime between the 1950s and the 1980s. Some of the most prevalent professions that encountered large quantities of asbestos include power plant workers, maritime workers, industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2022 were exposed decades ago. www.mesotheliomaoptions.com

Residents of Kansas who worked in the aircraft manufacturing and maintenance industry have a higher risk of developing asbestos diseases than most. Additionally, those who worked in Kansas' agricultural, chemical and power plant industries also have a higher risk of developing asbestos diseases. www.mesotheliomaoptions.com
