Telmisartan belongs to a class of antihypertensive drugs called angiotensin antagonists (ARBs). This medicine is used to treat hypertension (high blood pressure). It works by inhibiting the activity of certain substances that block blood vessels, allowing blood to flow faster and the heart to pump more efficiently. Telmisartan is also used to reduce the risk of stroke, heart attack, or death in people age 55 or older who are at high risk for heart disease. Telmisartan comes as a tablet to be taken by mouth. Telmisartan can be used alone or in combination with other drugs such as hydrochlorothiazide and amlodipine. It is available in different strengths of tablets.

Increase in prevalence of high blood pressure (hypertension), growth in geriatric population, surge in number of government initiatives for creating awareness about cardiovascular and blood pressure diseases are the major factors that boost the growth of the telmisartan market. In addition, marketing approvals for generic versions of telmisartan, and chronic disorders such as diabetes, further drives the growth of the market. Moreover, change in lifestyle, which in turn is expected to surge the demand for telmisartan in the global market. However, drug shortages are likely to restrain the growth of the telmisartan market. Conversely, surge in research related to telmisartan drug in emerging economies is expected to offer lucrative opportunities during the forecast period.
