

5G in Aviation Market Asia-Pacific Region to Rake at 24.4% CAGR During 2021 - 2030

[273 Pages] 5G in aviation market to reach \$4.68 billion by 2030, Small cell infrastructure to rise at 23.8% CAGR; eMBB technology to garner at 24.3% CAGR.

PORTLAND, OREGON, UNITED STATES, September 20, 2022 /EINPresswire.com/ -- According to the report published by Allied Market Research, the global [5G in aviation market](#) generated \$0.7 billion in 2020, and is projected to reach \$4.68 billion by 2030, witnessing a CAGR of 22.8% from 2021 to 2030. The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Upsurge in airline passenger traffic and government initiatives to support the development of 5G drive the growth of the global 5G in aviation market. However, high infrastructure cost involved in 5G technology deployment restrains the market to some extent. On the other hand, contracts and agreements with the aviation industry players and continuous advancements in 5G network present new opportunities in the upcoming years.

COVID-19 scenario:

The outbreak of the COVID-19 pandemic has had a negative impact on the global 5G in aviation market.

There was a significant decline in the supply of 5G technology for airport and aircraft applications during the initial phase of the pandemic.

Moreover, COVID-19 health crisis led to a lot of complexities in transportation as airports across the globe were facing bottlenecks in operational processes.

The report offers detailed segmentation of the global 5G in aviation market based on communication infrastructure, technology, end use, and region.
