

Labfront Grants Supporting The Next Generation of Researchers

Labfront has two upcoming research grants for students interested in collecting physiological data using Garmin wearable devices.

BOSTON, MASS, U.S.A., September 20, 2022 /EINPresswire.com/ -- Labfront, a leader in advancing data-driven health research, is offering grants for students

interested in collecting physiological data. The grant program provides up-and-coming researchers with the funding and tools they need to pursue valuable studies that help society.

The Labfront logo, consisting of the word "Labfront" in a bold, blue, sans-serif font. The "L" is significantly larger than the other letters.

Labfront is a global startup delivering health researchers a code-free digital biomarker collection and analytics platform to usher in a new era of data-rich research. As part of its mission to support academic research, Labfront runs annual grant initiatives in hopes of helping nascent researchers accomplish their study goals. The grants include Garmin wearables to help collect digital biomarkers such as heart rate and sleep. Labfront's 2022 Summer Grant received nearly 150 applications from students all over the world.

“

This grant program is a great way for students to utilize wearable technology that might have been inaccessible otherwise.”

Dr. Leon Brudy, Business Development Manager at Garmin Health

“Garmin is proud to be working with Labfront to provide wearable devices for their research grants,” said Dr. Leon

Brudy, Business Development Manager at Garmin Health. “This grant program is a great way for students to utilize wearable technology that might have been inaccessible otherwise.”

There are two upcoming research grants upcoming in this initiative, one will be given to an undergraduate student this fall, and the other to a graduate student in winter. Both grants are for students of all disciplinary backgrounds worldwide who are interested in collecting physiological data in their research. The awardee of each grant will be given an honorarium, a Labfront Advanced plan, and five Garmin wearable devices. Students can apply for the Fall 2022 Grant from now until November 15, 2022. Application dates for the Winter 2023 Grant will be announced soon.

For details on how to apply and for information on other grant opportunities, visit Labfront's [Grants page](#).

About Labfront

Labfront is a global startup specializing in health data analytics. It is currently disrupting academic health research through its code-free digital biomarker collection and analytics platform. With the recent explosion of sensors in the scientific community, Labfront is helping health researchers process the overwhelming amount of complex data and transition to the data-rich future.
