

# Interventional Oncology Market Size is Likely to Reach a Valuation of Around \$4,127.21 Million by 2031

The development & commercialization of these products, rising healthcare costs and expansion of research bases in countries such as China, Japan and India.

PORTLAND, OREGON, US, September 21, 2022 /EINPresswire.com/ -- Interventional oncology therapies are very beneficial for patients because these therapies are minimally invasive, have shorter recovery times, have very few side effects and less discomfort than other treatments. Some interventional oncology operations can

Interventional Oncology Market

also be performed as an outpatient procedure, which allows early discharge of the patient and thereby frees up hospital beds and reduces costs, and this is expected to drive market growth.

An increase in the number of patients suffering from liver, breast, lung and other types of cancer, an increase in preferences towards minimally invasive procedures, an increase in the target and elderly population, with an increasing level of government support for intervention. An increase in the number of oncology and public-private funding, technological advancements is driving the growth of the interventional oncology market.
