The operating income generated by Japan Display Inc. in 2020 was US\$ 373 Mn

At a -49.32% decrease from , Japan Display Inc.'s operating income of US\$ 285 Mn was indexed in 2019

To get exclusive information: <https://market.us/company/japan-display-inc/>

Japan Display Inc. generated an operating income of US\$ 563 Mn in 2018

Japan Display Inc. (JDI) is a leading display manufacturer that designs, develops, and

manufactures LCDs for smartphones, tablets, automotive applications, and other consumer electronics. The company went public in 2010 and is listed on the Tokyo Stock Exchange. JDI reported a net loss of ¥23.4 billion (\$205 million) in the fiscal year ended March 31, 2016, compared to a net profit of ¥10.3 billion in the previous fiscal year. This was primarily due to lower sales of LCD panels for smartphones and increased competition from Chinese manufacturers.

Looking at Japan Display's financial performance over the past few years, it's clear that the company has been struggling to maintain profitability. In the fiscal year ended March 31, 2016, JDI reported a net loss of ¥23.4 billion (\$205 million), compared to a net profit of ¥10.

## Challenges

One of the biggest challenges that Japan Display Inc. (JDI) is facing is the competition from South Korean and Chinese display manufacturers. JDI has been losing market share to these companies in recent years, and it is becoming increasingly difficult for JDI to compete on price. Additionally, JDI is also facing challenges from new technologies such as OLED and quantum dot displays. While JDI has developed its own OLED technology, it has yet to commercialize it on a large scale. And while quantum dot displays are not yet widely used in smartphones, they are expected to gain popularity in the coming years.

Another challenge for JDI is its reliance on Apple Inc. for a significant portion of its revenue. In 2017, Apple accounted for approximately 60% of JDI's revenue.
