Market Dynamics:

Growth in the historic period resulted from the rapid growth in the elderly population, strong economic growth in emerging markets, decline in oil prices, and health insurance reforms globally. Factors that negatively affected growth in the historic period were low healthcare access, shortages of skilled human resources, difficulty in manufacturing biologics, and regulatory changes.

Going forward, faster economic growth, technological developments and the increasing prevalence of diseases due to rising busy and sedentary lifestyles will drive the growth. Factors that could hinder the growth of this market in the future are rising interest rates, increasing awareness of alternative therapies and natural remedies, government provisions in healthcare services, and stringent government regulations.

Regional Outlook:

North America is the largest market for healthcare, followed by Asia-Pacific, Western Europe and then the other regions. Due to favorable regulations and policies in these regions, healthcare

industry is rapidly growing. As the market in developed countries is nearly saturated, market players have shifted their focus toward the developing regions, especially the emerging economies of Asia Pacific.
