The key highlights of the report include:

Market Overview (2017-2027)

- Forecast CAGR (2022-2027): 8.0%

The rise in prevalence of the eating disorder is anticipated to drive the binge eating disorder market. The treatment for binge eating disorder is available and recovery is possible with the right care. Growing public awareness of the disorder, along with the rise in the number of doctors skilled in the treatment of binge eating disorder, has made treatment more accessible.

The global binge eating disorder market is predicted to increase as a result of these factors. Also, the increase in the incidences of obesity among the population and the rise in the occurrence of eating disorders, especially among women, are also likely to accelerate the market growth.

Industry Definition and Major Segments

In the United States, binge eating disorder (BED) is a highly common eating disorder. The disorder causes people to eat an excessive amount of food in a single sitting. Individuals who binge feel a loss of control over their eating during these occasions. Binge-eating bouts are sometimes accompanied by feelings of guilt or shame. Obesity and overweight have been linked to binge eating.

By treatment, the market is segmented into:

- Medication
- Antidepressant
- Anticonvulsant
- Anti-obesity Medication
- Others
- Services
- Inpatient
- Outpatient

The several distribution channels of the market are:

- Retail Pharmacy
- Hospital Pharmacy
- Online Pharmacy

On the basis of region, the market is segmented into:

- North America

- Europe
- Asia Pacific
- Latin America
- Middle East and Africa
