

Bariatric Surgery Market Opportunities, Future Trends, Business Demand and Growth Forecast 2028

Rising prevalence of obesity and diabetes globally are among some major factors driving global bariatric surgery market revenue growth

VANCOUVER, BC, CANADA, September 22, 2022 /EINPresswire.com/ -- The global [bariatric surgery market](#) size is expected to reach USD 4.81 Billion at a steady CAGR of 9.0% in 2028, according to latest analysis by Emergen Research. Increase in number of patients requiring surgery and rising demand for minimally invasive surgical

procedures are some key factors fueling global bariatric surgery market revenue growth. Increasing prevalence of Type 2 diabetes and heart diseases are also driving market revenue growth. Rapid urbanization, lack of physical activity, and poor or unhealthy diets are contributing to increasing obesity. However, high cost of these surgeries and procedures is a key factor negatively impacting market revenue growth.

Some Key Highlights from the Report

In February 2021, Carrum Health expanded options for weight loss surgery in mid-west through partnership with the Bariatric Centre of Kansas City (BCKC). The centre has performed over 17,000 surgeries and the partnership will help improve quality of lives with improved access to high-quality bariatric surgery.

Assisting devices segment is expected to register steady increase in revenue growth during the forecast period as these devices are widely used in minimally invasive surgeries which require immediate closure of small incisions.

Gastric bypass surgery helps loose weight by changing how stomach and small intestine handles food. After surgery, the stomach will be smaller, and patient will feel full with less food consumption. This procedure is performed on patients who are seriously obese and have been unable to achieve desired weight loss through diets.

Non-invasive or minimally invasive surgeries enable completion of weight loss surgery without need for making a large, open incision. There are various types of minimally invasive surgeries such as single-site weight loss surgery, laparoscopic weight loss surgery, robotic weight loss

surgery, and endoscopic techniques.
