COVID-19 Scenario Analysis:

COVID-19 led to the lockdown in most of the countries which hampered the day to day activities. This also affected the growth of the food waste management market. The requirement for organic waste and biofuels has also reduced due to COVID-19 situation. This also affected the trade of these products which in turn hampered the growth of the food waste management firms in various countries around the world.

The sale of the food additives is expected to grow after worldwide release of the lockdown situation due to COVID-19

Top Impacting Factors: Market Scenario Analysis, Trends, Drivers and Impact Analysis
Increase in usage of organic waste for the production of fertilizers and animal feed as well as rise in the energy requirements are the major factors that drive the demand for food waste management systems. In addition, increase in processed food consumption including the ready-to-go meals is also expected to boost the market growth.

Surge in the population worldwide, environmental awareness and rapid urbanization & industrialization has further helped in boosting the demand for food waste management.

Opportunities for market growth

Anaerobic digestion is one of the new technological trends which is anticipated to boost the growth of the food waste management market. It helps in recovering nutrients and energy from the waste. The collection and segregation of waste is a major challenge.

Demand for Biofuels

Substantial growth in the domain of biofuel coupled with the fluctuations within the prices of crude oil is expected to boost the growth of the food waste management market during the forecast period. Methane, ethanol, biodiesel, and hydrogen are some of the biofuels produced out of food waste.
