

Drug Abuse Testing Market Size Worth USD 11,833 Million, Globally, by 2025 at 8.2% CAGR

Drug abuse testing market report provides a quantitative analysis of the market segments, current trends, estimations, and dynamics.

PORTLAND, OREGON, UNITED STATES, September 23, 2022

/EINPresswire.com/ -- [Drug abuse testing market](#) was valued at \$6,244

million in 2017, and is projected to reach \$11,833 million by 2025, growing at a CAGR of 8.2% from 2018 to 2025. Drug abuse test is a technique used to determine an individual's scope and degree of drug abuse/alcohol consumption. The test is usually performed for drugs of abuse such as marijuana, cocaine, amphetamines, benzodiazepines, PCP, opioids (narcotics), and others. Overuse of prescribed & illicit drugs is the major driver for the drug abuse testing market.

The drug abuse testing market is growing at a significant pace due to surge in incidence of drug abuse across the globe as well as rise in strict guidelines by the government agencies against the use of drug abuse in various fields including sports, schools, workplaces, and others. Further, leading manufacturers are focusing on the technological advancements in drug abuse test devices that contribute to the market growth. However, lack of awareness and consideration of drug testing as a breach of privacy rights in certain countries restrict the growth of the global market.

The consumables segment by product & service generated the highest revenue in 2017 and is

expected to maintain its dominance throughout the forecast period. This is attributed to the use of different consumables for drug testing such as assay kits, sample collection cups, calibrators and controls, and others.

Based on sample type, the market is classified into urine, oral fluid (saliva), breath, hair, and other samples. Urine sample generated the highest revenue among all the samples. Urine testing has been well established in forensic toxicology with added versatility and easier sample collection.
