

Current Scenario of Agritourism Industry by Emerging Trend Regional Insights Growth Opportunities and Future Scope

PORTLAND, OREGON, UNITED STATES, September 23, 2022 /EINPresswire.com/ -- Around the world, a sizeable portion of the populace may have little or no interaction with agriculture. As a result, agritourism is crucial in educating this group about farming practices and crop development. One way for non-farmers to learn about agriculture and support family farms by purchasing their goods directly or through intermediaries is through on-farm tourism. For instance, end users and suppliers (farmers and ranchers) are becoming more interested in agricultural and on-farm nature tourism in California (tourists & consumers of agricultural products and services). As a result, new growth possibilities in the agritourism industry are anticipated over the forecast period.

As per the report published by Allied Market Research, the global [agritourism market](#) was pegged at \$42.46 billion in 2019, and is projected to reach \$62.98 billion by 2027, growing at a CAGR of 13.4% from 2021 to 2027.

The growth of the worldwide agritourism market is driven by the expansion of the travel and tourism sector, government measures to promote agritourism, and an increase in the adoption of agri-allied businesses. However, inappropriate commercialization of agritourism and a lack of understanding among tourists limit industry expansion. On the other hand, market participants should expect attractive prospects in the future due to the rise in health consciousness that will boost the adoption of agritourism.

Growing demand for family-oriented recreation activities, demand for local food, and experience for farm stays are major attributing factor driving the growth of the Agritourism market. Furthermore, rising curiosity among young minds about the farm and rural activities are creating demand for Agritourism facilities. Agritourism is one such way, where people can find peace and relaxation, which they hardly find in urban areas. Covid-19 drastically impacted whole tourism and Agritourism industry, but decreasing cases of corona virus and development and implication of the corona virus vaccination throughout the world is likely to help tourism and Agritourism sector to regain its position

Key Take Away

The agritourism market was valued at \$42,460.3million in 2019, and is estimated to reach \$62,982.6 million by 2027, growing at a CAGR of 13.4% during the forecast period.

By activity, the accommodations segment is estimated to witness the fastest growth, registering a CAGR of 18.0% during the forecast period.

In 2019, depending on sales channel, the travel agent segment was valued at \$28,678.3 million, accounting for 67.8% of the global agritourism market share.

In 2019, the Italy was the most prominent market in Europe, and is projected to reach \$3,351.1 million by 2027, growing at a CAGR of 12.6% during the forecast period.
