Tool Management Software

Managing thousands of tools for production floor is now hassle-free with help of Fogwing Tools. Fogwing Tools enables the factory tools department to keep a track of tools or equipment inventory, rental, usage, and refurbishment online. It helps to eliminate manual tracking through papers, and digitally track tools' lifecycle management, their availability at the tools shop, functional status, cost of usage, renting, dispatch/return, maintenance status, and more.

The release of Fogwing Tools will abundantly benefit the small, medium as well as large manufacturing industries in their production efficiency. It is said that "When the right tool is on the right machine at the right time, you increase the productive working time by up to 30%".

In the words of Mr. Hariharan, Founder and Chief of Factana, "We are on the mission of driving the digital transformation for manufacturing customers. By adding Fogwing Tools to our

platform portfolio, we could solve another functional challenge in the production operation through digital technologies."

About Factana, is the Industry 4.0 solution provider specialized in IoT and AI-driven Industrial Automation solutions. Factana's Fogwing Industrial Cloud offers a smart factory MES/MOM solution as SFactrix.ai which helps to digitalize the factory floor production and execution. Factana offers a suite of Industry 4.0 products such as Fogwing IIoT Platform, Fogwing Analytics Studio, Fogwing Asset+, and more.
