Shrimp appear in all oceans in deep and shallow waters as well as in lakes and streams; this easy availability is fuelling its market growth and attracting more consumers. The antioxidants in shrimp are beneficial for an individual's health which is positively influencing the demand for the shrimp market among consumers. Such substances are likely to protect the cells of any individual against damage from oxidation. The antioxidant astaxanthin present in shrimp helps prevent wrinkles along with reducing sun damage. It also has enough selenium.

Containing two key elements of astaxanthin and selenium, shrimps are considered quite

nutritious as these two have an immense impact on the overall health and wellness of any individual. Shrimp offers a high amount of nutrients like iodine which aren't easily found in other foods.

Moreover, the shrimp market is also driven by the presence of several vitamins and minerals like calcium, iron, sodium, zinc, phosphorus, magnesium, iodine, potassium, riboflavin, and niacin, thiamine, and vitamin A, vitamin E, vitamin B6, and vitamin B12. Such numerous vitamins, minerals, and nutrients together make shrimp healthy food. This further aids in maintaining healthy bones, preventing hair loss, improving memory performance, reducing menstrual cramps, reducing the danger of occurrence of lung and prostatic adenocarcinoma, and eliminating bad cholesterol. Such numerous aspects are aiding the shrimp globally over the forecasted period.

### Shrimp Industry Definition and Major Segments

Shrimp is one of the most commonly consumed types of shellfish. It is a spineless marine animal that belongs to the most significant class of crustaceans called Malacostraca.
