- “1. Make sure you are insuring your property for the correct value. If your property is under-insured, you may not have enough coverage to rebuild in the event of a total loss. On the other hand, if your property is over-insured, you will be paying more for your insurance than necessary.
2. Make sure you understand the different types of coverage available and purchase the coverage that is right for your business. For example, if you are a property owner, you will need to purchase property insurance. If you are a business owner, you will need to purchase liability insurance.
3. Shop around and compare prices from different insurance companies. There is a wide range of prices for similar coverage from different insurance companies. By shopping around, you can find the best price for the coverage you need.
4. Make sure you have the right type and amount of coverage for your needs. There is no one-size-fits-all insurance policy, so it’s important to work with an experienced broker like Gregg Marcus to make sure you’re getting the right coverage for your specific situation.”
