Jason Lulos of the Pacific Book Review speaks highly of the book. "Airplane Stories and Histories: Volume I" is a well-written, concise history of modern aviation for the general public or the specialist. Author Norman Currey is an expert in the field and in addition to this well-informed overview of the last 200 years of human flight; he corrects many misconceptions about the significant 'firsts' in this area of human invention. This is a very interesting first volume."
