

# Atrial Fibrillation Market Value is Expected to Garner USD 3.4 Billion by 2030, at CAGR of 6.4%

*Atrial fibrillation market report provides a quantitative analysis of the market segments, current trends, estimations, and dynamics.*

PORTLAND, OREGON, UNITED STATES, September 26, 2022

/EINPresswire.com/ -- [Atrial fibrillation market](#) size was valued at \$1,825.85 million in 2020, and is estimated to reach \$3.4 Billion by 2030, growing at a CAGR of 6.4% from 2021 to 2030. Atrial fibrillation is a type of irregular heartbeat characterized by rapid and irregular beating. Blood may clot and congest in the atria at the same time because of insufficient blood received by ventricles. These clots can enter the circulation and reach the brain, causing stroke. The transmission of electrical impulses to the lower heart chambers is disrupted in atrial fibrillation, which causes a rapid, slow, or irregular heartbeat. During atrial fibrillation, upper chamber and lower chamber of the heart beat irregularly, chaotically, and out of sync, which causes shortness of breath, chest pain, weakness, and lightheadedness or fainting.

□□□□ □□ □□□ □□□□□□□□ :

Key players focus on expanding their portfolio by introducing technologically developed products, which are expected to help reduce the risk of stroke and atrial fibrillation in patients. For instance, in April 2021, ArtiCure, Inc., a major pioneer in atrial fibrillation (Afib) therapy introduced Epi-Sense System, which is approved by the U.S. Food & Drug Administration (FDA). Epi-Sense System is used to treat patients with long-standing persistent cardiac arrhythmias or atrial fibrillation.

□□□□□□-□□ □□□□□□□□□□:

However, during the COVID-19 pandemic lockdown, various manufacturers in the atrial fibrillation market had to stop their business in countries, such as China, the U.S., and India, which negatively affected the atrial fibrillation market growth. This break directly impacted the sales and decline in atrial fibrillation market share. In addition, lack of manpower and raw

materials also constricted supply of equipment of atrial fibrillation, which negatively influenced the growth of the market. However, reopening of production facilities and introduction of vaccines for COVID-19 are anticipated to lead to re-opening of atrial fibrillation companies.
