The escalating requirement for consumer electronic products offering high-quality video resolution displays is one of the primary factors driving the USB data cable market. Additionally, the rising adoption of USB data cables in closed-circuit television (CCTV) security cameras providing low-cost and reliable connectivity to communication devices is further catalyzing the market growth. Besides this, government organizations worldwide are focusing on modernizing the existing grid infrastructures by utilizing new transmission lines, which is acting as another significant growth-inducing factor. Moreover, the widespread availability of USB data cables across numerous online as well as brick-and-mortar retail stores and the growing penetration of video-on-demand (VoD) services are also positively influencing the market. Apart from this, the launch of upgraded product versions with enhanced power efficiency and performance is anticipated to fuel the global USB data cable market over the forecasted period.
