

Defence Ammunition Market Development of lightweight ammunition by 2031

PORTLAND, ORAGON, UNITED STATES, September 26, 2022 /EINPresswire.com/ -- [Defence Ammunition Market](#) outlook By 2031: Ammunition is an object that can be discharged from a weapon. Types of ammunition include bullets, bombs, land mines, missiles, grenades, and others. The size of ammunition is expressed in terms of calibre (measured in millimetres or inches). Ammunition are designed according to the weapons from which it would be used. Ammunition which are less than calibre 20 mm are categorized as small arm and larger calibre ammunition are considered as artillery. A complete round of ammunition includes all the components essential for firing of the gun or weapon, such as projectile, propellant, and a primer (use to ignite the propellant). Artillery ammunition can be classified into high-explosive, armoured piercing, nuclear, chemical, and anti-personnel.

Increasing military budget in developing countries, growing terrorism activities, and rising geopolitical disputes & conflicts among neighbouring countries are some of the major factors that drive the defence ammunition market. However, formulation & stringent implementations of gun control legislation are hampering the market growth. On the contrary, development of lightweight ammunition and increasing research & development to develop advance ammunition will contribute further in the growth of global defence ammunition market.
