The key highlights of the report include:

Market Overview (2016-2026)

Historical Market Size (2020): USD 1 Billion

Forecast CAGR (2021-2026): 11.5%

Forecast Market Size (2026): USD 1.9 Billion

The global market for primarily cells is majorly driven by the rising cases of cancer and the

resultant utilisation of primary human cells in various treatments like cell regeneration and cell therapies, among others. Since cancer is recognised as the leading cause of fatalities, governments, and private institutes all around the world are rapidly investing in advanced healthcare technologies for effective cancer treatment hence providing impetus to the market growth of primary cells. In addition to this, the use of human primary cells is progressively becoming a preferred choice for understanding the effects of cancer cells on human body, without being subjected to animal cells which in turn is further accelerating the growth of the market.

Industry Definition and Segmentation

Primary cells refer to cells taken directly from living tissues of animals or humans and are then processed to establish them for use in relevant cell therapies.

On the basis of origin, the market can be segmented into:

- Animal Primary Cells
- Human Primary Cells

The market, based on cell type, can be categorised into:

- Dermatocytes
- Gastrointestinal Cells
- Heart Cells
- Hematopoietic Cells
- Hepatocytes
- Cryopreserved Hepatocytes
- Fresh Hepatocytes
- Lung Cells
- Musculoskeletal Cells
- Renal Cells
- Others

Based on end user, the market can be divided into:

- Life Science Research Companies
- Research Institutes

The regional markets for the industry can be categorised as follows:

North America
Europe
Asia Pacific
Latin America
Middle East and Africa
Market Trends

The growth in the global market for primary cells can be attributed to the rising investments into research and development (R&D) programmes of various biotechnological and biopharmaceutical industries. The effective utilisation of primary human and animal cells for the development of vaccines against diseases like rabies, chickenpox, and polio among others is further aiding the market growth of primary cells globally.

Key Market Players

The major players in the market are Merck KGaA, Axol Bioscience Ltd., Cell Biologics, Inc., Lonza Group AG., and PromoCell GmbH, among others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.

About Us:

Expert Market Research (EMR) is leading market research company with clients across the globe. Through comprehensive data collection and skillful analysis and interpretation of data, the company offers its clients extensive, latest, and actionable market intelligence which enables them to make informed and intelligent decisions and strengthen their position in the market. The clientele ranges from Fortune 1000 companies to small and medium scale enterprises.

EMR customises syndicated reports according to clients' requirements and expectations. The company is active across over 15 prominent industry domains, including food and beverages, chemicals and materials, technology and media, consumer goods, packaging, agriculture, and pharmaceuticals, among others.

Over 3000 EMR consultants and more than 100 analysts work very hard to ensure that clients get only the most updated, relevant, accurate and actionable industry intelligence so that they may formulate informed, effective and intelligent business strategies and ensure their leadership in the market.
