The robo-taxi market consists of sales of robo-taxi products by entities (organizations, sole traders, and partnerships) that are used for autonomous mobility on demand (AMoD) services. Robo-taxis are autonomous vehicles that are used for pickup and dropping off passengers or goods without the need for drivers, which can reduce the cost of transportation and make transport more affordable for day-to-day operations. Robo-taxis are technologically advanced cars that use various advanced driver assistance systems such as front crash prevention systems and rare crash prevention systems, spotting different objects around them for smooth function of driving, lane departure prevention, and others that can drive safely.

[Global Robo Taxis Market Trends](#)
