Changing urban mobility outlook and increasing investment by the market players drive the growth of the global flying car market. On the other hand, high development cost of the flying cars and stringent regulations for aviation license impede the growth to some extent. However, the untapped potential of the Asia-Pacific market has been highly beneficial for the market growth.

COVID-19 scenario-

The outbreak of COVID-19 led to disrupted supply chain and distorted manufacturing activities in the automotive sector, thereby impacting the flying car market negatively.

However, the global situation is getting ameliorated slowly & steadily, and the market is projected to recoup soon.
