

mHealth Market in Asia-Pacific to Grow at a CAGR of 35.8% to Reach USD 14.4 Billion by 2020

mHealth market report provides a quantitative analysis of the market segments, current trends, estimations, and dynamics.

PORTLAND, OREGON, UNITED STATES, September 27, 2022

/EINPresswire.com/ -- [Asia-Pacific mHealth market](#) and would continue to dominate throughout the forecast period. China was the largest country market in the Asia Pacific region and is expected to maintain its dominant position during the forecast period. Factors such as growing population, rising disposable incomes and a large presence of local manufacturers would boost the market growth. Mobile health (mHealth) is an area of electronic health (eHealth) that offers revolutionized healthcare services through unique smartphone based technologies that enable the remote monitoring of patients. Increasing adoption of smartphones, growing awareness of newer technologies and increasing consumer preferences towards healthy lifestyles are prime factors that supplement the adoption of mHealth devices. Moreover, the continued growth in coverage of mobile cellular networks and increasing count of lifestyle diseases such as diabetes, obesity, including others would further drive the growth of the Asia Pacific mHealth market. However, lower accuracy, weak reimbursement coverage and low adoption of devices among aging population are factors that could hinder the market growth.
