eClinical solution is a software-based program that combines clinical technology and expertise to help life sciences organizations accelerate their clinical development processes. These solutions are used to record data in real-time and automate and conduct clinical trials. The system aids in analyzing, managing, maintaining, and recording clinical data. It consists of randomization and trial supply management (RTSM), clinical trial management system (CTMS), and clinical data management system (CDMS). Moreover, the eClinical solution functions with web-based applications and can be installed on-premises or deployed through cloud-based platforms. Currently, they are widely employed across diagnostic centers, hospitals, clinics, and other healthcare institutions.

eclinical solutions Market Size Report 2022-2027

## Global eClinical Solutions Market Trends and Drivers:

The global eClinical solutions market is primarily accelerated by rapid improvements in the healthcare infrastructure, especially in developing regions, due to the implementation of favorable government policies. Additionally, the increasing demand for eClinical solutions across the biopharmaceutical industries to seek regulatory approvals for newly developed medicines and drugs is bolstering the market growth. In line with this, the rising incorporation of software solutions in clinical trials and surging investments in healthcare IT solutions are creating a positive outlook for the market. Moreover, the integration of the Internet of Things (IoT) with medical devices and the increasing trend of outsourcing clinical trials to contract research organizations (CROs) are boosting the market growth.
