The changing consumer inclination towards biodegradable and environmentally sustainable packaging solutions is among the key factors driving the paper bag market. Moreover, the rising environmental concerns towards the usage of plastic packaging are also bolstering the product demand. In addition to this, the expanding consumer goods sector and the growing number of retail outlets across countries are also positively influencing the global market. Along with this, the rising adoption of paper packaging in processed food products applications is acting as another significant growth-inducing factor. Furthermore, the emergence of organic and natural product variants is also bolstering the market growth. Besides this, various technological advancements are leading to the increasing penetration of automated manufacturing techniques for paper bags, which is further augmenting the global market. In the coming years, the widespread product adoption in the construction industry for packaging several building

materials is projected to fuel the market growth across the globe.
