The DevOps global market consists of the sale of DevOps solutions and services by entities (organizations, sole proprietors, partnerships) that refer to the tools used for the integration of software developers (dev) and operations (ops). These tools operate on a software engineering technique that combines the activities of software development and software operations teams by encouraging cooperation and shared accountability. It also enables software developers (devs) and operations (Ops) teams to strive for faster delivery through automation, collaboration, rapid feedback, and iterative improvement.

Global DevOps Market Trends
Technological advancements are the latest trend gaining popularity in the DevOps market. The companies in the DevOps market are incorporating innovative technologies like machine learning (ML) and artificial intelligence (AI) to offer technologically advanced products that are cost-effective and operationally beneficial.
