The vacuum insulation panel market consists of sales of vacuum insulation panels by entities (organizations, sole traders, and partnerships) that refer to thermal insulation that consists of a gas-tight shell enclosing a rigid core that has been evacuated of air. They are manufactured with a microporous core encapsulated and vacuum sealed in an impermeable high gas barrier film under vacuum. The advantages of vacuum insulation panels are good thermal efficiency, reliable long-term performance, and the ability to fit in tight spaces in new buildings.
