The automotive environment is changing at a rapid pace due to globalization. Therefore, increase in automotive sales due to improvement in manufacturing facilities in most of the emerging countries such as China, India, and Brazil is a key factor that drive the demand for automotive seats. Improvement in productivity of automotive seats in the automotive sector is anticipated to influence prominent players to invest and expand the business through different segments such as electric and internal combustion engine. In addition, increase in disposable income of consumers and surge in passenger vehicles sale across the globe fuel the demand for automotive vehicles, which in turn is expected to boost the growth of the automotive seat market.

Developing countries such as India, China, and Brazil are the most promising countries for the automotive sector, owing to increase in sales of electric vehicles. Furthermore, increase in awareness about the latest technology used in automotive and rise in deployment of automotive seat in automobiles from the giant companies are expected to fueling the growth of the market. The automotive seat market trends are decided on the basis of forecast from 2018 to 2025. In recent years, consumers have shifted their interest toward technologically advanced, autonomous seating that have number of applications. This in turn increases the overall use of automotive seat components in vehicles, thereby boosting the automotive seat market growth.
