

Drone Donation #43 Case Closed 9/26/22 Amazing Partners At Autel Robotics, FoxFury, SkyeBrowse & Pilot Institute.

*Seaside Park Police Department In NJ
Now Has Life Saving Drone Technology To
Help Protect Officers And The Community*

HEBRON, CT, UNITED STATES,
September 30, 2022 /

EINPresswire.com/ -- "In September of 2016, Seaside Park was the target of a terrorist bombing by Ahmad Khan Rahimi. Rahimi who was inspired by ISIS and al Qaeda planted an IED on our boardwalk, along the route for the Seaside Semper Five Marine Corps Charity 5K race. The start of the race was fortunately delayed, had the race started on time, the bomb would have detonated as runners were passing by where Rahimi planted the device. This is another instance where a drone would have given us the tactical advantage of putting eyes in the area as opposed to placing First Responder directly in harm's way.

“

Our Department is so appreciative of the generosity of Autel Robotics & National Public Safety Drone Donation Program & other supporters! This donation will help keep our officers & community safer!"
Detective Mantz

Every year we receive a number of calls for missing children in town. A drone would give us a greater chance of finding the child in a shorter time. As well all know, time is critical in these situations. We have also received a number of calls for swimmer's/boaters in distress. Our beaches are not manned 24/7 with lifeguards and our fire department is volunteer. We are not equipped with a boat or jet ski. Earlier this week we were dispatched to a boater in distress in the Bay with three children on board taking on water. A drone would provide us with the ability to

pinpoint the exact location of individuals as well as drop flotation devices." Said Detective Mantz.

Drone donation number 43 Seaside Park police Department case closed

Post Donation the department expressed deep appreciation for the generosity of all involved. The National Public Safety Drone Donation Program is on a mission to help put life saving drone technology in the hands of public safety agencies in need of support.

As new UAV / sUAS technology is deployed the older technology gets shelved, we encourage agencies and the private sector to donate those drones to our foundation. We can either donate it to a public safety agency in need or through our growing STEM program to help educate kids across the country through our partnership with Women and Drones.

Please make a modest donation today and help support our foundation, together we can make a difference one donation at a time. Public Safety agencies with a budget for drone hardware, software or training should contact NPS-DDP.org to assure best possible pricing to help your budget funding go as far as possible. Plus when any Hardware , software or training is purchased though our network 5% of the net proceeds gets donated back to NPS-DDP.org to help more departments. It is a Win-win for all involved.

The National Public Safety Drone Donation Program is so thankful to all of our partner supporters this particular donation could not have happened without the support of [Autel Robotics](#) and the added support from other key partners [FoxFury Lighting Solutions](#), [SkyeBrowse](#) and [Pilot Institute](#) .

"Eyes In The Sky For Every Department In Need"™

How does our program work? We get this question all the time.

We prioritize requests from Public Safety Departments and STEM organizations from all over the United States to receive drone technology using the following criteria:

- Departments/Organizations with no drone program always get first consideration.
- Departments that have a Part 107 or FAA certified pilot in the department. If no pilot is available, we will give the department 30 days to take action to put one in place, holding the donation for up to 60 days.
- We receive a donation addressed to go to a specific department or organization.
- Drone manufacturers or partners donating equipment will be able to determine which department will receive their hardware or software. NPS-DDP respects their criteria for donations and will only choose a department when the manufacture/donor gives us that option.

We partner with amazing organizations to bring our mission to life for our Public Safety partners. We would love to see your brand listed below in support of our mission.

Our partners include:

Please consider joining our corporate sponsors and support of public safety.
