Why is Kona Earth coffee special?

Kona Coffee is internationally known and commands some of the highest prices in the world. The Kona Coffee Belt is a tiny strip of land on the western side of the Big Island. Just a few miles wide and about 30 miles long, the area has "Goldilocks" conditions for growing exceptionally fine Arabica coffee. Kona Earth Coffee farm is situated at 2000 ft on the tropical slopes of the Hualalai volcano. The high mountain (mauka) climate allows the coffee trees to grow lush. Cooler temperatures and ample rainfall make for ideal growing conditions. The fruit matures slowly, resulting in coffee beans of remarkable size and quality

Made in the USA

Unlike farm workers in other coffee-producing regions around the world, Kona's coffee farm workers are paid a living wage, so you can feel good knowing that your coffee is fair trade and ethically sourced.

Don't be Fooled

"Kona blends" abound with as little as 10%Kona coffee beans. Look for 100% Kona coffee on the label to get the true taste of paradise.
