

Constipation Treatment Market Size to Hit \$13.2 Billion by 2027 | Exhibit a CAGR of 5.9% (2022-2027)

Surging Applications of Methylcellulose Fiber are therefore Fuelling the Growth of the Constipation Treatment Market

HYDERABAD, TELANGANA, INDIA,
September 28, 2022 /

EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Constipation Treatment Market](#) size is estimated to reach \$13.2 billion by 2027, growing at a CAGR of 5.9% during the forecast period 2022-2027. Constipation Treatment normally starts with diet and lifestyle alterations. Laxatives are

materials that influence the intestines in a way that causes bowel activity. Polyethylene glycol with or without electrolytes is more effective than a placebo for the treatment of functional constipation. Methylcellulose fiber is utilized to treat constipation and to assist in keeping up normal bowel movements. Currently, numerous opioid receptor antagonists have been presented in the treatment of Opioid-induced constipation (OIC). Lactulose is a kind of sugar utilized to treat constipation. As per investigations, linaclotide seems to be a well-tolerated and efficient agent for patients with chronic constipation. The constant R&D to establish new medications to treat constipation is set to drive the Constipation Treatment Market. The surging application of methylcellulose fiber for constipation treatment is set to propel the Constipation Treatment Industry during the forecast period 2022-2027. This represents the Constipation Treatment Industry Outlook. The report offers a complete analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.
