The airport and marine port security market consists of sales of products and services by entities (organizations, sole traders, and partnerships) that are used to protect a shipping port and airport facility from terrorism, other illegal activities, and activists. Airport and Marine port security refers to an ecosystem which provide safety to air cargos and protection of vessels, both internally and externally. It also refers to the measures taken to ensure that treaties signed with other countries are properly enforced.

Global Airport And Marine Port Security Market Trends

Technological advancement is a key trend gaining popularity in the airport and marine port security market. Major companies operating in the airport and marine port security market are focused on developing new technological solutions to strengthen their position. For instance, in April 2019, Honeywell, a US-based company providing airport and maritime port security services, launched a first-of-its-kind technology integration with Intel that enables new artificial intelligence (AI) capabilities in its MAXPRO® connected security platform. This platform supports
