The distributed generation market consists of sales of distributed generation products by entities (organizations, sole traders, and partnerships) used to provide electricity during power outages, including those that occur after severe storms and during high energy demand days. Distributed generation refers to a set of activities conducted for the development and sale of small-scale generated energy.

Global [Distributed Generation Market Trends](#)

Technological advancements are the key trend gaining popularity in the distributed generation market industry. Companies operating in the distributed generation market are developing advanced products to strengthen their position in the market. For instance, in May 2022, Delta India, a subsidiary of Delta Electronics Inc., a Taiwanese-based company operating in distributed generation, has developed a medium-voltage QPR product named 11kV 3-phase Power Quality Restorer to resolve issues related to a plethora of power quality problems such as voltage fluctuations, flickers, equipment failures, and others with higher efficiency. Additionally, 11Kv3-Phase QPR is capable of providing current harmonic compensation in both leading and lagging reactive power, correcting power load imbalance, regulating voltage, and reducing electric bills in
