The nasal polyps treatment global market consists of sales of nasal polyps treatment by entities (organizations, sole traders, and partnerships) that are used for the treatment of nasal polyps which shrink or disrepair the nasal polyps. Nasal polyps are soft, painless noncancerous growths on the lining of your nasal passages or sinuses. They dangle like grapes or teardrops and are linked with asthma, persistent infection, allergies, medication sensitivity, and other immunological disorders.

Global [Nasal Polyps Treatment Market Trends](#)

New product innovation is a key trend gaining popularity in nasal polyps treatment. Major companies operating in the nasal polyps treatment global market are focusing on new product innovations to strengthen their position in the market. For instance, in July 2021, GlaxoSmithKline Plc, a UK-based pharmaceutical company, announced the approval for Nucala (mepolizumab) by US Food and Drug Administration (FDA). Nucala (mepolizumab) is a monoclonal antibody that targets interleukin-5 (IL-5) and is a treatment for patients with chronic rhinosinusitis and nasal polyps. This new indication for mepolizumab is for the maintenance treatment of CRSwNP in adult patients aged 18 and up who have not responded to nasal

corticosteroids.
