

Asbestosis Treatment Market is Expected to Grow at a Potential CAGR of 5.05% During the Forecast Period

Asbestosis Treatment Market is Expected to Grow at a Potential CAGR of 5.05% During the Forecast Period

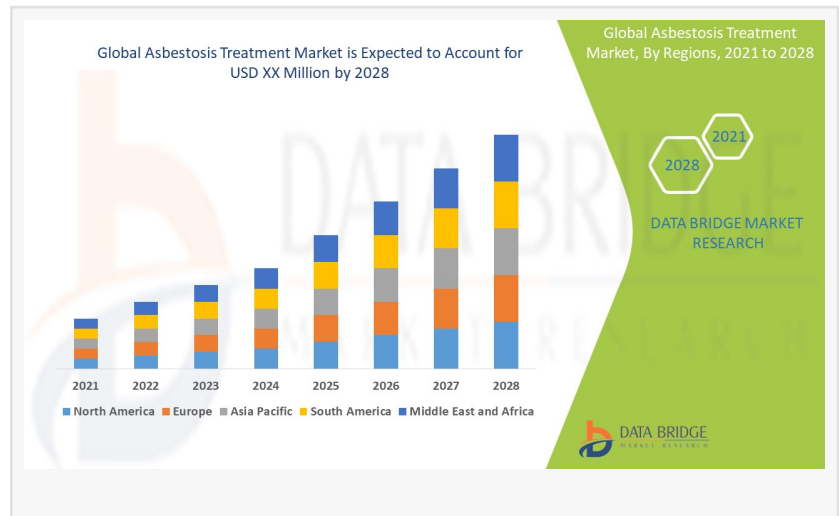

PUNE, MAHARASHTRA, INDIA,
September 28, 2022 /

EINPresswire.com/ -- The [global market for asbestosis treatment market](#) is

anticipated to grow at a potential rate of 5.05% during the forecast period from 2021 to 2028. Increasing prevalence of asbestosis is the vital factor driving the escalation in market

growth. Asbestosis is a chronic inflammatory lung disease caused by the inhalation of fibrous asbestos particles, which are commonly found on construction sites and industrial areas.

Prolonged exposure to these fibers can cause scarring of lung tissue and difficulty breathing. Symptoms may not be seen during the initial stages of exposure, but continued exposure to these particles can cause cancer of the inner lining of the lungs, manifesting in symptoms such as chest tightness, chest pain, loss of appetite, dry cough and lumps on the fingers and toes that appear wider and rounder than normal (disc).
