

# South East Asia New-born Screening Market is Valued at CAGR of 10.17% During the Forecast Period 2029

*South East Asia New-born Screening Market Industry Analysis and Forecast 2029*

PUNE, MAHARASHTRA, INDIA, September 28, 2022 /EINPresswire.com/ -- [South East Asia New-born Screening Market](#) report with its market research studies help anticipate next move of the competitors while keeping business in a better position to avert any possible damage from their end. Market research can help identify markets and geographical areas where business can expand to. It can also help to invest in ideas that have the most potential to succeed based on what customers are looking for and what the market is lacking. For any retail company, conducting market research can be useful to make out locations where the store can profit the most.

Data Bridge Market Research analyses that the New-born screening market is growing at a CAGR of 10.17% in the forecast period of 2022-2029.

New-born screening means a group of special tests, together with blood, hearing, and heart screening, done to one- to two-day-old infants, commonly before they leave the hospital. This can be to envision for any serious health disorders that don't show signs at birth.

The growing awareness of the benefits associated with the neonatal screening is the major factor accelerating the growth of the New-born screening market. Furthermore, continuous innovation in neonatal screening tests is expected to boost market growth over the forecast period. In addition, raising funds from a government agency to promote neonatal screening are also expected to drive the growth of the New-born screening market. However, shortage of trained professionals and the lack of technologically advanced equipment will restrains the New-born screening market, whereas, shortage of skilled professionals will challenge market growth.

In addition, next-Generation Sequencing technology will create ample opportunities for the New-born screening market.

This New-born screening market report provides details of new recent developments, trade regulations, import export analysis, production analysis, value chain optimization, market share, impact of domestic and localised market players, analyses opportunities in terms of emerging revenue pockets, changes in market regulations, strategic market growth analysis, market size, category market growths, application niches and dominance, product approvals, product

launches, geographic expansions, technological innovations in the market. To gain more info on New-born screening market contact Data Bridge Market Research for an Analyst Brief, our team will help you take an informed market decision to achieve market growth.

About Data Bridge Market Research, Private Ltd

Data Bridge Market Research Pvt Ltd is a multinational management consulting firm with offices in India and Canada. As an innovative and neoteric market analysis and advisory company with unmatched durability levels and advanced approaches. We are committed to uncovering the best consumer prospects and fostering useful knowledge for your company to succeed in the market.

Data Bridge Market Research is a result of sheer wisdom and practice that was conceived and built-in Pune in the year 2015. The company came into existence from the healthcare department with far fewer employees intending to cover the whole market while providing the best class analysis. Later, the company widened its departments, as well as expand its reach by opening a new office in the Gurugram location in the year 2018, where a team of highly qualified personnel joins hands for the growth of the company. "Even in the tough times of COVID-19 where the Virus slowed down everything around the world, the dedicated team of Data Bridge Market Research worked round the clock to provide quality and support to our client base, which also tells about the excellence in our sleeve."
