

Embedded Display Market Worth \$26.4 Billion by 2027 At A Growth Rate of 8.2% - IndustryARC

The Use of Embedded Displays in 3D Systems is Also One Of The Drivers Enhancing The Embedded Display Market Growth.

HYDERABAD, TELANGANA, INDIA, September 28, 2022 / EINPresswire.com/ -- IndustryARC, in its latest report, predicts that The [Embedded Display Market](#) size is forecast to reach \$26.4 billion by 2026, growing at a CAGR of 8.2% from 2021 to 2026. The Embedded display market is estimated to witness substantial

growth over the forecast period primarily due to the growing demand of Embedded displays in medical, automation, industrial, wearable and other sectors. The report offers a complete analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.

Key takeaways :

1. The Embedded display market is estimated to witness substantial growth over the forecast period primarily due to increase in adoption of Embedded display by automation, medical, wearable and other sectors.
2. Due to high efficiency, longer life, high intensity, high pixel-pitch and brightness LED technology in embedded display is expected to have substantial growth over the forecast period.
3. Rise in adoption of automated embedded devices in the market has a great impact for the

Market Research Reports, Business Consulting
Services & Analytics

market growth of Embedded displays. The high quality display at low cost makes the Embedded displays propel into the market.

4. It is observed that in the recent past research and development activities for Embedded displays in North America are rising, thus creating a market for Embedded display as this has a great impact on adoption by medical, automation and other sectors.

5. Embedded display market is dominated by North America followed by Europe. APAC region is considered to have fastest growth due to increase in automation and other sector by the countries like India, China and others.

Segmental Analysis :

1. The market is segmented by Technology into LCD, LED, OLED and others. The High pixel-pitch, brightness, enhanced efficiency, high light intensity, enhanced power efficiency, long lifespan and high scalability makes LED technology much more acceptable and is expected to propel the market grow.

2. The fixed device is expected to hold largest market share in forecasted period 2026 at 56%. Its affordable price, high scalability, longer life, contrast and pixel resolution and more, makes fixed device to be accepted more into the market than portable devices. Due to the above factors fixed device is adopted more into the market by automobile and several other sectors and is expected to boost the Embedded display market.

3. Embedded Display market is dominated by North America at 36% share in 2020 followed by Europe. The Research and development activities at the industry-level in North America is continuously rising and making rapid advancement in automated embedded device technology which is increasing the adoption rate of embedded display devices in healthcare, automotive, industrial sectors, defense and others.

Competitive Landscape :

The top 5 players in the Embedded Display Industry are -

1. Microsoft Corporation

2. Eaton Corporation

3. Green Hills Software Inc.

4. Intel Corporation

5. Anders DX

Why Choose IndustryARC?

IndustryARC is one of the leading market research and consulting firms in the world. It produces over 500 unique market reports annually. If you are looking for a detailed overview of a particular market, you can simply connect with the team at IndustryARC. You can not only buy your preferred market report from the website, but also get personalized assistance on specific reports.
