

# Aluminum Casting Market Size Will be Expected to Grow at a CAGR of 6.3% By 2027 | Reports and Data

*The growing use of aluminum in automobile manufacturing & the increasing need for aluminum from the construction sector is driving the demand for the market.*

NEW YORK CITY, NEW YORK, UNITED STATES, September 28, 2022

/EINPresswire.com/ -- The [Aluminum Casting market](#) is forecast to reach USD

78.02 Billion by 2027, according to a new report by Reports and Data. The growing use of lightweight materials in various end-user industries will be one of the leading market trends for aluminum casting over the forecast period. Increased use in sectors such as aerospace and automotive has further boosted the market's growth. The demand has vast opportunities because aluminum is favored over iron and steel products in the automotive industry.

The increasing demand for consumer goods, high investment in mining, construction, and electronics, expansion in manufacturing, and developing economies are also driving the market growth. Aluminum Casting provides high conductivity and corrosion resistance. It gives all shapes with high tensile strength and high stability.

Aluminum is being replaced by magnesium as a liquid metal, which restricts the growth of the casting market for aluminum. The problem the aluminum casting industry faces is monitoring the effect of aluminum cast production on the climate. Factors such as high aluminum casting machinery costs and high investments in aluminum casting technology developments are likely to hamper demand development.

Key participants include Gibbs Die Casting Corporation, Ryobi Ltd., Consolidated Metco Inc., Walbro, Alcoa Corporation, Martinea Honsel Germany GmbH, Aluminum Corporation of China Ltd., Alcast Technologies, Dynacast, Bodine Aluminum Inc., among others.

Reports And Data

Further key findings from the report suggest

The demand is experiencing significant growth due to technical advances and high performance.

The market position of the die casting segment can be attributed to the excellent performance and the economical nature of the process, which provides a broader range of shapes and components than other casting techniques. Due to the escalating demand for aluminum casting products in the automotive industry, the die casting segment accounted for a share of 41.6% in 2019.

The Asia-Pacific region (APAC) dominates the market by generating a revenue of USD 22.78 billion in 2019. The demand for automobiles has risen as a result of population growth in this area, which in turn has to contribute to an increase in the market in emerging economies like China and India.

The scope is growing in agricultural equipment, construction equipment, mining equipment, and other heavy-duty machinery. India is amongst the largest producers of farm equipment such as tractors, tillers, and harvesters.

Aluminum helps by using its thermal transfer capabilities to control the temperature around the battery modules in warm or cold weather. Thus, the transportation segment, from aviation to automobile, would drive the growth of the demand for aluminum casting during the forecast period.

Apple's development company has led the way in producing aluminum laptops. Often, flat-screen TVs benefit from the aluminum's lightweight property; an identical steel product would be too heavy to hang on a wall helping the market grow in technology & appliances.

Process Type Outlook (Revenue, USD Billion; 2017-2027)

- Die Casting
- Permanent Mold Casting
- Sand Casting

End-user Outlook (Revenue, USD Billion; 2017-2027)

- Transportation
- Industrial
- Buildings & Construction
- Others

Sources Outlook (Revenue, USD Billion; 2017-2027)

- Primary
- Secondary

## Key Regional Markets Covered in the Report:

North America (U.S.A., Canada, Mexico)

Europe (Italy, U.K., Germany, France, Rest of Europe)

Asia Pacific (India, China, Japan, South Korea, Australia, Rest of Asia Pacific)

Latin America (Chile, Brazil, Argentina, Peru, Rest of Latin America)

Request a customization on the report <https://www.reportsanddata.com/request-customization-form/3022>

## Key Questions answered by the Report:

What is the expected year-on-year growth of the during the forecast period?

What key trends are expected influence revenue growth of the market going ahead?

Which region is expected to account for largest revenue share over the forecast period?

Which key companies are profiled in the report?

Thanks for reading our report. For more details on customization, please connect with us to know more and our team will ensure the report is well suited to your needs.

## About Reports and Data

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyze consumer behavior shifts across demographics, across industries, and help clients to make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Products, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Reports and Data has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
